

Home Care Package funding and fees (as at Oct 2019)

The Benevolent Society's primary focus in the provision of Home Care Packages is to understand what help you want and what you can afford. Our aim is ultimately to support your goals and enable you to do more of the things you love doing. We will work with you to determine how this can be best structured within the Home Care Package environment.

There are two sides to the Home Care Package:

1 The **budget** which is the **income bucket** and

2

The **service charges** which are drawn from the budget to **pay for services**.

The Budget or Income Bucket

There are a number of ways this income bucket (budget) is filled. These include:

Government Funds

(which is the subsidy) and the amount of this depends on your package level

Income Tested Fee

The government will assess your income and dependant on this assessment your government funds or subsidy may be reduced requiring you to contribute that amount to your budget.

Basic Fee

This is a fee that the Government allows a provider to charge to cover some of their costs, we will ascertain in the first instance your ability to pay this fee before charging you. It is a maximum rate of 17.5% of single aged pension.

Supplements

There are number of supplements that the government pays for specific conditions or situations, examples include dementia, individual requiring oxygen and Veterans supplements to name a couple. You will need to meet the eligibility criteria to receive these.

Top-ups

You may also want to contribute your own money to enable you to receive more services or more hours of services, this is then added to your income bucket.
